

Liquid Fence® Armadillo Repellent

Short Description:

Liquid Fence Armadillo Repellent stops the digging! The long-lasting, non-gel formula won't clog sprayers and is as easy to apply as watering the lawn. It's earth, family and pet-friendly and safe on all vegetation. So stop the digging insectivores today.

Long Description:

Liquid Fence Armadillo Repellent spray repels armadillos and stops the digging in lawns, flower beds and landscaped garden areas.

From Florida to Oklahoma, Missouri to southern Indiana, armadillos are moving across America, damaging landscapes and gardens — one yard at a time. These armor-plated mini tanks can turn a lawn and landscape into a battlefield and ruin thousands of dollars in valuable plants, landscape and flowerbeds.

The Liquid Fence Company is commanding these mini tanks to “Move on out!” This Armadillo Repellent has a long-lasting, non-gel formula that won't clog sprayers and is as easy-to-apply as watering the lawn. And it's earth, family and pet-friendly and safe on all vegetation.

Non-gelling means non-clogging. Liquid Fence Armadillo Repellent will keep hose-end type sprayers clog-free at temperatures as low as 33° fahrenheit – much lower than other armadillo repellents that will gel and clog at average well water temperature!

How to use: Apply Liquid Fence Armadillo Repellent liberally to lawns or landscaped areas.
