

## **CowPots™**

### ***Short Description:***

**CowPots are 100% biodegradable planting pots.** Made from composted cow manure, CowPots go directly into the soil with the plant, adding natural nutrients to grow healthier plants. Made in the USA from a renewable resource, CowPots are easy to handle, virtually odor-free and non-toxic.

### ***Long Description:***

**CowPots are 100% biodegradable planting pots.** Made from composted cow manure, CowPots go directly into the soil with the plant, adding natural nutrients to grow healthier plants. Made in the USA from a renewable resource, CowPots are easy to handle, virtually odor-free and non-toxic.

CowPots, manure-fiber based pots, are made by American farmers for plant lovers everywhere! These earth-friendly “pots you plant” are made with biodegradable, 100% renewable composted cow manure. The special CowPot manufacturing process removes weeds and pathogens, and eliminates the offensive odor typically associated with manure. All that’s left is the natural fiber and goodness of manure: for the perfect plantable pot!

### **CowPots give seedlings a better beginning.**

Tender, young roots easily penetrate the sides and bottoms of CowPots, allowing for unrestricted growth... and healthier roots mean stronger plants.

### **Planted CowPots breakdown fast in the ground.**

Composted manure naturally biodegrades quickly, so at 3 to 4 weeks, decomposition is well underway!

### ***Bullets:***

- **All natural – Made with 100% renewable composted cow manure**
- **Planted CowPots biodegrade fast**
- **Roots easily penetrate CowPots**
- **Virtually odor-free!**
