

## **Liquid Fence® Dual Action Rabbit Repellent**

### ***Short Description:***

Advanced dual-repellency formula for persistent/high-density rabbit problems and difficult-to-repel baby rabbits. Most rabbits can be repelled with scent alone. Because of the high volume of young rabbits and their voracious appetites, high density rabbit populations can be an extremely persistent problem. For this reason we've developed a dual-action formula that repels with both scent and taste – a guaranteed-effective, one-two punch to fight extreme rabbit problems! Safe for use on edible crops.

### ***Long Description:***

Fight unruly rabbits and protect your plants with **Liquid Fence® Dual Action Rabbit Repellent**. While most rabbits can be repelled with scent alone, high-density rabbit populations include many young rabbits with voracious appetites, and can be an extremely persistent problem. For this reason we've developed a dual-action formula that repels with both scent and taste – a guaranteed-effective, one-two punch to fight extreme rabbit problems!

**Now safe on edible crops!** Dual Action Rabbit Repellent, with its advanced dual-repellency formula, is safe to use on edible crops. Save your garden from becoming the local all-you-can-eat buffet for bunnies and rabbits. Spray Liquid Fence Dual Action Repellent on the edible plants. Just be sure to not apply immediately before harvest on above-ground crops.

**How to use:** Apply liberally to plants and their perimeter during a dry period. Repeat process 1 week later and then approximately once per month, thereafter. Areas where feeding pressure from rabbits is intense, spray Liquid Fence Dual Action Rabbit Repellent once a week for 3 weeks and then approximately once per month thereafter. This will “train” the rabbits to avoid your yard! Do not apply to above ground edible crops immediately before harvest. Please note: when using Liquid Fence you may notice an odor, however once it dries, the odor will not be noticeable to humans, but still very noticeable to animals.

### ***Bullets:***

- **Now for use on edible crops, too!**
- **Eco-friendly and easy-to-use**
- **Dries odorless**
- **Repels with scent & taste!**
