COWPOTS™ **The Pots You Plant!**

*All natural – Made from
100% Renewable
Composted Cow Manure*

*CowPots stay intact for
up to 12 weeks before planting
in the ground*

Planted CowPots biodegrade fast

Roots easily penetrate CowPots

Enriches garden soil, naturally!

Perfectly odor-free!

Made from 100% renewable composted cow manure, CowPots™ give seedlings a better start. Tender, young roots easily penetrate the sides and bottoms of CowPots, allowing for unrestricted growth... and healthier roots mean stronger plants.

Planted CowPots breakdown fast in the ground. Composted manure naturally biodegrades quickly, so at 3 to 4 weeks, decomposition is well underway!

CowPots are durable and long-lasting before planting seedlings in the ground – staying intact for up to 12 weeks – plenty of time to give seedlings a good strong start!

Best of all, the manure in Cowpots is a renewable resource, unlike peat which is mined from bog eco-systems or plastic which is derived from finite fossil sources!

Item #	Size & Type	Case Pack
CP3-12	3 in. (175 mL capacity) Pot - 12 pack	12
CP4-12	4 in. (450 mL capacity) Pot - 12 pack	12
CP3-00	3 in. (175 mL capacity) Pot - loose	1,176
CP4-00	4 in. (450 mL capacity) Pot - loose	450
