Other Ingredients: Water, Hydrogen Peroxide,
Acetic Acid, Food Grade Dye

We've given Speedy Grow® Plant Booster a brand new look that your customers won't be able to resist!

Applied alone or in combination with a favorite fertilizer, Speedy Grow has an almost unbelievable effect on the growth of indoor and outdoor plants, flowers, bushes, trees and lawns. Greener, lush foliage – beautiful, plentiful blooms – thick, resilient grass! All from 100% natural ingredients extracted from organic kelp seaweed.

How does Speedy Grow work?

Quite simply, Speedy Grow copies nature. By providing additional naturally occurring plant growth hormones, called Cytokinins and Auxins, Speedy Grow helps generate new root growth. This enables the plant to absorb MORE nutrients. That's why Speedy Grow makes your favorite fertilizer work even better... it BOOSTS its effectiveness!
